## Final Views From The Desk of Dr Aditya Vijay Kashyap

The global economy is currently navigating a transformational phase shaped by geopolitics, energy security, artificial intelligence, ESG investments, and sovereign capital movements.

India remains one of the world's strongest long-term growth economies despite temporary volatility arising from crude oil prices, foreign investor outflows, and geopolitical uncertainty. Infrastructure, digital transformation, renewable energy, defence, logistics, and tourism continue to offer long-term strategic investment opportunities.

### Network Office India / Overseas

Institutional investors globally are increasingly focusing on resilient economies, sustainable infrastructure, climate finance, and strategic resource development. Nations capable of balancing growth with sustainability will emerge as long-term leaders in the coming decade.

The future global economy is expected to witness integrated smart economic ecosystems combining ESG finance, tourism, renewable energy, technology, and strategic infrastructure, especially across Asia and emerging markets.

Disciplined investment strategies, diversification, and long-term vision will remain essential in navigating the evolving global financial environment.
